CONTENTS

M. W. Curtis—*A Turing Machine Simulator* 1

Robert M. McClure—*A Programming Language for Simulating Digital Systems* 14

J. A. Robinson—*A Machine-Oriented Logic Based on the Resolution Principle* 23

Sheila A. Greibach—*A New Normal-Form Theorem for Context-Free Phrase Structure Grammars* 42

Eric Wolman—*A Fixed Optimum Cell-Size for Records of Various Lengths* 53

H. Glass and L. Cooper—*Sequential Search: A Method for Solving Constrained Optimization Problems* 71

M. Donald MacLaren and George Marsaglia—*Uniform Random Number Generators* 83

Aaron Booker—*Numerical Evaluation of Symmetric Polynomials* 90

R. W. Hockney—*A Fast Direct Solution of Poisson's Equation Using Fourier Analysis* 95

J. H. Bramble and B. E. Hubbard—*Approximation of Solutions of Mixed Boundary Value Problems for Poisson's Equation by Finite Differences* 114

J. C. Butcher—*A Modified Multistep Method for the Numerical Integration of Ordinary Differential Equations* 124

Edward B. Anders—*An Error Bound for a Numerical Filtering Technique* 136

Arthur Gill—*Analysis and Synthesis of Stable Linear Sequential Circuits* 141

Paul W. Broome—*Discrete Orthonormal Sequences* 151

David G. Moursund—*Examination of Multiple Roots and Root Clusters of a Polynomial Using the Bernoulli Procedure* 169

R. D. Glauz—*On the Numerical Solution of Ordinary and Partial Differential Equations Using Integral Relations* 175

Charles B. Dunham—*Convergence Problems in Machly's Second Method* 181

G. P. Weeg—*The Automorphism Group of the Direct Product of Strongly Related Automata* 187

Shen Lin and Tibor Rado—*Computer Studies of Turing Machine Problems* 196

J. T. Chu—*Optimal Decision Functions for Computer Character Recognition* 213

R. L. Crane and R. W. Klopfenstein—*A Predictor-Corrector Algorithm with an Increased Range of Absolute Stability* 227

Herbert Kanner—*Number Base Conversion in a Significant Digit Arithmetic* 242

Walter Penney—*A "Binary" System for Complex Numbers* 247

Jerry Sanders—*Document Association and Classification Based on L-Languages* 249

Stephen Glicksman—*Concerning the Merging of Equal Length Tape Files* 254

W. J. Dixon and R. A. Kronmal—*The Choice of Origin and Scale for Graphs* 259

C. L. Sheng—*Threshold Logic Elements Used as a Probability Transformer* 262

S. Winograd—*On the Time Required to Perform Addition* 277

R. W. Stineman—*Digital Time-Domain Analysis of Systems with Widely Separated Poles* 286

W. Fraser—*A Survey of Methods of Computing Minimax and Near-Minimax Polynomial Approximations for Functions of a Single Independent Variable* 295

A. P. Yershóv—*One View of Man-Machine Interaction.* Translated by Nicholas Zvegintzov 315

RICHARD W. CONN AND RICHARD E. VON HOLDT—*An Online Display for the Study of Approximating Functions* 326
M. V. MENON—*On a Problem Concerning a Central Storage Device Served by Multiple Terminals* 350
WILLIAM K. WINTERS—*A Modified Method of Latent Class Analysis for File Organization in Information Retrieval* 356
FRANCO MILETO AND GIANFRANCO PUTZOLU—*Statistical Complexity of Algorithms for Boolean Function Minimization* 364
J. M. S. SIMÕES PEREIRA—*On the Boolean Matrix Equation* $M' = \mathbf{v}_{i=1}^{d} M^i$ 376
DAVID MOURSUND—*Chebyshev Solution of n + 1 Linear Equations in n Unknowns* 383
PATRICK C. FISCHER—*Generation of Primes by a One-Dimensional Real-Time Iterative Array* 388
D. J. NEWMAN—*Location of the Maximum on Unimodal Surfaces* 395
A. PAZ AND B. PELEG—*Ultimate-Definite and Symmetric-Definite Events and Automata* 399
MICHAEL YOELI—*Generalized Cascade Decompositions of Automata* 411
